- D. When you want to know “When is it now?”, you can call 117.

(33~35) 閱讀理解

One of the biggest problems with vehicles is the pollution they let out. One step taken to solve this problem is the introduction of the hybrid car. The term “hybrid” means “a combination of two things”. The hybrid car has an electric-powered engine put together with a gas-powered one, all in one car. The car runs on electricity, yet when extra power is needed or the electric engine needs more energy, the gas-powered engine starts up. This results in only a small role for the gas engine and therefore less pollution. Of course, a car that produces no pollution is the final goal but at least we are headed in the right direction.

vehicle 車輛 solve 解決 introduction 引進 term 術語 combination 結合
extra 額外的 produce 生產 result 結果 direction 方向

33. According to the reading, what does the word “hybrid” mean?

- A. A type of bird in the sky.
- B. A combination of two things.
- C. A type of engine.
- D. A type of car.

34. What starts up when the hybrid car needs extra power?

- A. The radio.
- B. The gas engine.
- C. The electric engine.
- D. The pollution.

35. What is the good part of a hybrid car?

- A. It produces less pollution.
- B. There are no advantages.
- C. It is fast.
- D. It is cheap.
