Eddy was born in Taiwan, but he moved to the United States with his parents when he was six years old. Not being able to speak English made it difficult for him and his family to get used to their new life there at first, and of course, going to school was even bigger problem for him. Luckily, he met great teachers who kindly helped him with his language problem. As his English got better, he became less shy to talk to his classmates and have made a lot of new friends. He still speaks Chinese at home and is now a great helper to his parents in everyday life. For him, the best part of being bilingual is that he can enjoy books, TV shows and movies both in English and in Chinese.

The part of our brain dealing with our language ability is mainly in our left brain, at the place about above the ear. Studies show that bilingual speakers use their brains in a different way from one-language speakers. They use more parts of the brain at the same time. As we know, many parts of our brain are connected to more than one functions. Studies also found that bilingual children are more able to pay attention and so do better on most of their learning.

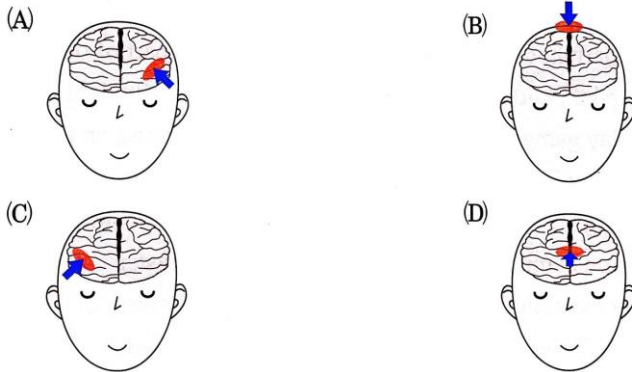

It may not be easy to learn a new language at first, but all your hard work will pay off in a much bigger way in the end.
